## Continuing Education Courses

The Board of EMS provides this information as a courtesy to attendants seeking continuing education. Many continuing education programs are submitted with a year long schedule that is not date specific (i.e. CPR will be taught during March.) In those cases the date of first class is listed as the first day of the month and the date of last class is listed as the last day of the month. The courses MAY BEGIN AFTER the date of first class and/or END PRIOR to the date of last class. Class dates frequently change or are cancelled. Not all classes are open to the public. There may be a charge to attend some classes.

Obtaining continuing education AND THE PROPER DOCUMENTATION is the ATTENDANT'S responsibility. The attendant MUST make PRIOR CONTACT with the person listed above to obtain the necessary class information and BE GRANTED PERMISSION to attend. This is very important particularly when practical skills are being taught. Instructors are required to maintain at a minimum, a 1:6 instructor to student ratio. Failing to maintain this ratio could seriously jeopardize the students' educational opportunities. The Board of EMS does not guarantee the availability of the courses and accepts no responsibility for them.
