Defining the Field of Intraosseous Medicine™

Dear Customer:

Thank you for using the EZ-IO intraosseous infusion system. The needle sets you have received are in a new improved package and were released with a 2 year expiration date.

Since released, the Vidacare EZ-IO package has undergone additional accelerated age testing that provides evidence that the packaging will maintain sterility of the product for 4 years from the date of manufacture. Therefore any needle set listed in the table below originally labeled for 2 years can be extended to 4 years. Vidacare can supply labels to re-label needle sets to the new date by individual request.

Product Part Number	Product Name	Lot Number	Sterilization Date	Labeled Expiry	New Expiry
9001	25 mm	AV10E02	May-2010	May-2012	May-2014
9018	15 mm	AV10E03	May-2010	May-2012	May-2014
9079	45 mm	AV10E04	May-2010	May-2012	May-2014

Vidacare plans to discontinue increasing the maximum expiration date for needle sets beyond 4 years unless there is additional input in the future to do so. Needle sets are single use and there are no plans to re-sterilize needle sets that have gone beyond expiration date.

Please review the enclosed flyer which provides a description of the benefits of this new configuration.

If you have any questions or additional concerns about Vidacare products please contact our Clinical Support Line at 1-800-680-4911 (option 2). Thanks for being an EZ-IO user.

Thank you,
